

MORE BANG FOR YOUR BUCK.

Heat pump water heaters
are the cool way to get hot water.

1

Save up to 50% on your
water heating energy costs.

2

Easy to install and
lessen your carbon footprint.

3

Receive cash back rebates
through Noble REMC!

But how is a heat pump water heater different?

Heat pump water heaters work like traditional air source heat pumps that heat your home in that they don't actually make heat: they move heat from one place to another.

In essence, a heat pump water heater is like a refrigerator in reverse. Your fridge pulls heat from inside the cabinet and puts it into the room, leaving what's inside colder. In contrast, a heat pump water heater pulls heat from the room and brings it into a tank to heat water.

*Ready
to buy?*

NOBLE REMC HAS YOU COVERED.

**Buy a heat pump water heater from us,
and you will:**

- ✓ Pay the same as our purchase price
- ✓ Earn an \$800 Power Moves cash back rebate
